Good news for Homemakers

1983: the year of the onion

By SHIRLEY W. WALTON
Extension Agent

This is the year of the onion. You can eat all you want to -- raw, boiled, baked, fried or creamed -- and not even make a dent in the onion storage crop of nearly 2.2 billion pounds. Can you believe that many onions grew in this country? That's 11% more than last year's large crop.

Onions are low in calories and give you nutrients, including calcium, phosphorus, potassium, carbohydrates and iron, as well as you get burps from eating them.

When shopping for onions, the US Department of Agriculture suggests that you look for hard or firm onions which are dry and have small necks. Onions should be covered with paper-like outer seals and be free from green sunburned spots and other blemishes. Store onions in a cool dry place. They do not have to have cold storage, but you do need to keep them in a very dry place. I find that it's easy to store onions in your refrigerator. Do not store them next to milk in a paper carton unless you like onion-flavored milk.

Many of you have expressed before an interest in the historical origin of some of our vegetables. As I have written articles about vegetables, I have found it most interesting to research the history of the vegetable. Did you know that the wilds of Asia claim to be the home of the first onion which belongs to the lily family, the Alliums.

Since ancient times onions have been herald as a strength building food and champions for their healing qualities. Huge quantities of this now popular bulb were fed to the builders of the great Egyptian pyramids about 3,000 B.C.

These pyramid builders were unaware that onions provided them with a goodly amount of calcium and Vitamins A and C and that they contained significant amounts of iron and B vitamins. Even though this practice was followed, the Egyptians continued to defy this member of the lily family. This was either because the onions concentric form represented heaven, hell and earth in their respective positions or, as some scholars insisted, it symbolized the sun. Thus onions were considered sacred by these Egyptians.

Now onions are one of our most popular foods. Tossed with vegetable salads, you can make a zinny onion dressing by combining one cup finely chopped onion, with one cup mayonnaise, two tablespoons lemon juice, one teaspoon salt and one cup unflavored yogurt. If this is chilled thoroughly, it is delicious, zesty and zippy served over your favorite salad. This makes approximately three cups of dressing.

If your family enjoys eating onions as a side dish with your meals, you may prepare them in a very quick way in the microwave oven. To prepare slices of onions, place them in a single layer in an open dish. Sprinkle with grated parmesan cheese and cook three minutes. Delicious, delectable and zesty will be this addition to an evening meal.

You may wish to add onions to your diet right now because of the tremendous onion crop. There is a bountiful supply and the cost is not as high as it has been other years.

If you have a homemaking question or problem, you may call 382-8244 or write P.O. Box 488, Appomattox, VA 24522. It is always a pleasure to help you and to hear from you.

Have a good week!

AES is accredited

The Southern Association of Colleges and Schools, through its Commission on Elementary Schools, has awarded continuing accreditation to Appomattox Elementary School by action taken during the Association's 87th Annual Meeting here December 12-15, 1982.

Through accreditation, school staff and faculty members will benefit by knowing that conditions for teaching in accredited schools meet certain minimum standards and that efforts are continuously made to improve these conditions. Regional standards require adequate faculties and facilities and their effective use.

Citizens are assured of accountability and of value for their tax dollars through the process of standard setting and the regular reevaluation of SACS member institutions. Communities with accredited schools can be confident that their institutions compare favorably with others in the region. Accredited schools are a "plus" for those who are interested in relocating their families and businesses.
